

▶ Metsi MultiCloud Assessment & Strategy Workshop

- Have you have reflected on your multicloud strategy?
- Have you determined your approach to how your application landscape and business drivers are aligning to your multicloud strategy?
- Are you paving your own way with an Application-Centric strategy?
- The Internet of Everything is bringing together people, process, data, and things to make networked connections more valuable than ever before. However, the challenges of complexity, speed, and resiliency are likely to intensify.

Typical workshop agenda:

- Vision & Business requirements
- Solution Components
- Solution Critical Capabilities
- Solution Features
- Solution/Service Design
- High Level Use cases
- Current Tools & Integration points
- Project Approach
- Implementation Plan
- Operational Considerations

Metsi's Strategy Workshop key features

Assess the impact of automation and cloud management and present an integrated value proposition for:

1. Enterprise self-service with an enriched user experience
2. Enabling a service oriented culture, such as Infrastructure, Platform, Container, IT, and X as-a-Service
3. Optimizing the modelling and provisioning of monolith or micro-services base applications to multiple cloud environments
4. End-to-end service delivery and fulfilment with a business orchestration solution

METSI TECHNOLOGIES HAVE EXPERIENCE TO DRIVE INNOVATION AND CHANGE IN ENTERPRISE

The agenda of this workshop¹ is tailored to your specific requirements. After this workshop you'll be able to understand the value proposition and positioning of multicloud solutions and how they align to your requirements. The outcome of this workshop would be a proposal to deliver a proof of value project based on identified solution areas.

¹ For a successful workshop, an initial preparation call will be held with the stakeholders to agree the workshop agenda, and after the workshop a report will be produced, reviewed and presented.
